SUMMARY

AI/backend engineer (B.Tech CSE, GITAM University, 2027) who ships production systems. Built VIA — a multiagent AI that autonomously generates and deploys full-stack apps from a plain-English prompt, live-demoed at an Innovation Summit. Currently cleaning production ML datasets at Excelerate. Focused on AI systems, FastAPI backends, and CI/CD automation.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Frameworks & Tools: FastAPI, Spring Boot, n8n, Playwright, GitHub Actions, Git, Render, Railway, HTML/CSS

AI / ML: Groq LLM API, Multi-Agent Systems, NLP, Supervised ML, Data Analysis

Databases & Practices: PostgreSQL, MySQL, RESTful APIs, CI/CD, OOP, DSA, Agile

OS: Linux (Kali), Windows

EXPERIENCE

AI Data Analyst Intern · Excelerate — Remote Jan 2026 – Present

- Cleaned and validated 10,000+ records per sprint, raising dataset accuracy by ~25% and directly improving input quality for production ML pipelines.
- Cut data validation turnaround by 30% by standardising collection and review workflows across 3 active ML datasets.
- Caught and resolved 100+ data inconsistencies before they reached model training, eliminating a recurring source of pipeline errors.

Web Development Intern · GAO Tek Inc. — Remote Apr 2025 – Jun 2025

- Delivered 8+ client-facing pages in HTML/CSS/JS; structured code reviews reduced reported UI bugs by 40%.
- Fixed cross-browser rendering across 4 browsers, cutting visual inconsistencies by 35%.

PROJECTS

VIA — Autonomous AI Development System Jan 2026 – Present

Python · FastAPI · Groq LLM · PostgreSQL · GitHub Actions · Render

- Architected a 4-agent AI system (CEO, Backend, Frontend, DevOps) that takes a plain-English prompt and autonomously generates, tests, and deploys a working full-stack app — no human steps required.
- Built a CI/CD pipeline using GitHub Git Trees API for atomic single-commit pushes and Render auto-deploy; cut release time from 15+ minutes to under 3 minutes.
- Reduced manual development effort by ~70% on prototyped applications; live-demoed at an Innovation Summit to an audience of technical judges.

Automated Job Application System 2025 – Present

n8n · Playwright · Node.js · Groq LLM · Railway · Excel

- Built a fully automated job discovery pipeline scraping fresher/entry-level listings from LinkedIn and Naukri daily using Playwright-powered scrapers hosted on Railway.
- Integrated Groq LLM to auto-score each job against a personal profile using ATS logic, filtering out roles requiring experience and surfacing only relevant fresher opportunities.
- Delivered scored results to a structured Excel report on a scheduled 9:30 AM trigger via n8n, eliminating manual job searching entirely.

EDUCATION

B.Tech, Computer Science Engineering 2027 (Exp.)

GITAM University, Bengaluru · GITAM (Deemed University) · CGPA: 7.76

Intermediate (XII) Jul 2023

LRG Naidu Jr College, Anantapur · Andhra Pradesh Board · 937 / 1000 · 93.70%

SSC (X) Aug 2021

ZPHS School Demeketh, Anantapur · Board of Secondary Education · 577 / 600 · 96.17%
